IMS ExpertServices is in the business of making connections. We connect Fortune 500 companies and top law firms with the best experts across the globe.

Our Process

When an attorney contacts us about a case, we utilize a unique search process, employing both internal and external resources devoted to finding precise experts who fit the client's specifications.

We then contact expert candidates to confirm qualifications, availability, interest, and ensure that they are conflict-free.

The most highly credentialed and experienced candidates who meet the project needs are then presented to the attorney. We do not reveal names or contact information of our experts without their permission.
